Student Experience Fund

Funds raised in support of a Student Experience Fund will help support valuable out-of-classroom experiences and hands-on learning that will supplement their education. Our challenge is to raise $50,000.

Impact Statement:

This fund has the potential to impact students now and in the future. It will benefit their current education through experiential learning and inspire them to take leadership roles to benefit their professional careers.

As one student wrote after attending a networking experience at Health Canada:

“I am confident to say that the past weekend was one of my most influential days. I got a chance to meet, talk, and connect with people who are in the field that I love, doing work built on the values that I have set for myself. My main take-away from this weekend would have to be that opportunities are everywhere.”

Goals:

We believe this fund is essential to enhancing learning experiences by allowing students to participate in unique and developmental activities no matter their economic situation. With additional support, we can encourage these experiences to foster personal and professional development.

The fund would provide many students with opportunities for:

- Student symposiums
- External career events
- Student initiatives such as; women in science, ask a scientist, let’s talk science and science encounters
