SPECTRUM

On Now until Labour Day 2019

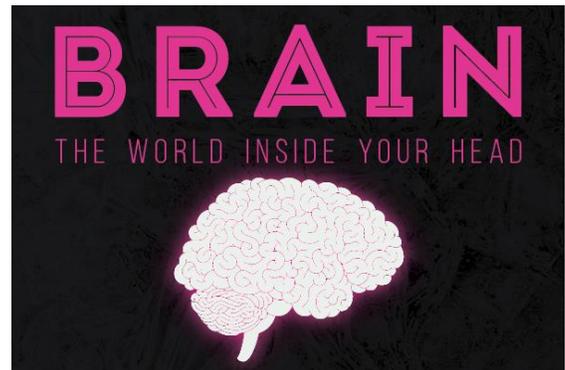

SPECTRUM is a seismic, interactive, immersive, mind-blowing, playable experience coming to THEMUSEUM! Local and international artists will create 14 fun and colourful installations for all ages. From sensory ball pit rooms to experiencing sound transformed into sight, this innovative hands-on exhibition will explore the effect that colour has over you. We are thrilled to develop this wonderful experience for the entire community and unlike many museums, our signs will say Please Touch! So don't forget your camera and be prepared to step over the threshold of colour.

BRAIN: The World Inside Your Head

On Now until Labour Day 2019

Using innovative special effects, video games, optical illusions and interactive displays, BRAIN shows how the brain functions – and sometimes – malfunctions. This hands-on and interactive exhibition provides an up close look at the human body's most essential and fascinating organ by exploring its development, geography and function. The exhibition makes brain-related disorders, such as Alzheimer's, depression and addiction, easier to understand. Explore the relationship between depression and creativity, how drugs work in the brain, and the nature of pain as well as the future of brain treatments, genome mapping and molecular medicine.

When you buy exhibition admission at www.THEMUSEUM.ca with your promo code, you receive 25% off for you and your family!
